TCXFAX is a paperless faxing solution that saves money and time. With TCXFAX there is no need for a fax machine, toner cartridges, ink cartridges, or paper. All outgoing and incoming faxes are managed with a few clicks of a mouse. The savings from just ink cartridges and paper alone can pay for the service many times over. Furthermore, there are no paper faxes to file, misplace, or shred. Incoming faxes display a notification on your computer letting you know when they have arrived. You may view, delete, print, or save any incoming fax. All faxes, whether saved or deleted, are kept in an archive file for audit trail purposes. Saved faxes can be put in any file folder, and multiple copies can be sent to multiple folders. Outgoing faxes can have customized cover pages, and can be any combination of single or multiple pages from one or more documents or reports, including scans.

Two TCXFAX solutions are provided by Tele Comm, one using your computer and one using our fax server, which we install in your office and maintain for free.

Table with 3 columns: PRODUCT DESCRIPTION, SET UP FEE, MONTHLY FEE. It lists two TCXFAX solutions: one using your computer (Setup: \$99.00, Monthly: \$49.00) and one using the company's computer (Setup: \$499.00, Monthly: \$49.00). Each entry includes a detailed description of the service and its requirements.
